Features

- 12VDC constant voltage power supply with max. 60W output power
- Durable aluminum chassis with IP67 waterproof rating, suitable for use in dry and wet locations
- Output wire leads and input 3-prong plug for easy connections
- Automatic thermal & overload cut-off, short circuit protection
- Efficient, long life, stable, and reliable

Description

This power supply is a high reliability solution for powering electronic devices that require a 12VDC power source. Small and compact, convection cooling, and waterproof casing are some of the additional features that make these power supplies a great choice for various applications.

Suitable for indoor and outdoor use without direct exposure to sunlight. Make sure that the load does not exceed the maximum power output of the power supply.

Specifications

Input Voltage:	110VAC, 50/60Hz
Output Voltage:	12V DC
Output Power:	60W
Current, Full Load:	5A
Operating Temp.:	-4 ~ +104°F
Cord Length:	6" DC side, 30" AC side, 18AWG
Dimensions:	7.5"L x 2.75"W x 1.75"H
IP Rating:	IP67
Compliance:	CE
Warranty:	1 year
